STORAGE TANKS

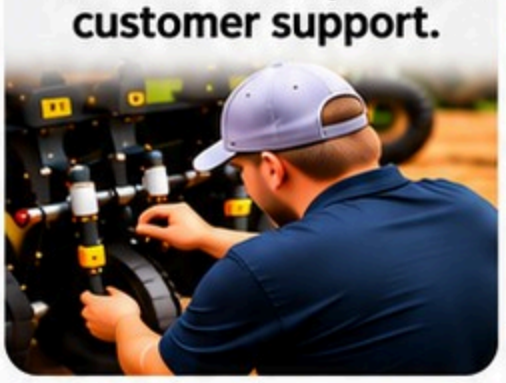
Bulk liquid fertilizer storage options

DRILL KITS

Get your drill set up for liquid fertilizer

INSTALLATION AND SUPPORT

We install and provide customer support.



LIQUID CARTS

Field-ready liquid cart options

HOW THE PROGRAM WORKS

1 AgTek360 Supplies the Equipment

AgTek360 can provide storage tanks, drill conversions, liquid fertilizer carts and associated equipment

2 Five-Year Equipment Cost Recovery

Equipment costs are spread over five years. Depending on the equipment price, an additional cost per litre is included in the fertilizer price to recover the equipment cost.

Example: $10,000 Storage Tank (CAD)

$10,000 CAD ÷ 5 years = $2,000 CAD per year
At **40,000 litres** purchased annually, **$0.05 CAD per litre** is added to the fertilizer price to cover the equipment cost.

WHY CHOOSE AGTEK360?

- **Minimal upfront investment**
- **Simple, flexible payments**
- **Complete equipment solutions** (tanks, drill kits, installation and liquid carts)
- **Ongoing agronomic support and customer service**

Program subject to equipment approval, a minimum annual purchase of 40,000 litres of qualifying liquid fertilizer and a signed five-year agreement
