PRODUCT INFORMATION: GoldStart is the most popular low-salt, 80/20 ratio of ortho-to-polyphosphate liquid fertilizer in the PureGrade product line. It is 100% pure liquid fertilizer produced from the finest quality raw materials. It is seed safe and is designed to be placed in furrow, positioned 2x2 from the seed during planting or foliar applied.

DIRECTIONS FOR USE: Use in accordance with recommendations of a qualified individual/institution. Do not mix with calcium based fertilizers. Do not allow to freeze. Always jar test for compatibility.

Soil Application: Apply in-furrow, 2x2, or at sidedress or topdress. Use caution when applying directly on the seed in saline, alkali, or coarse textured soils.

Foliar Application: Fill spray tank with water prior to adding fertilizer or other products. Use only as a supplement to a regular nutrient management program. Repeat applications may be beneficial. Use only as directed to avoid foliar burn. Do not apply when crop is excessively stressed for moisture or during periods of high temperatures. Use of a surfactant may enhance leaf coverage and increase nutrient absorption.

RECOMMENDED RATES: This product should be used on the basis of a soil and/or tissue analysis. Suggested application rates are for one growing season (gallons per acre) in the absence of soil and/or tissue analysis.
