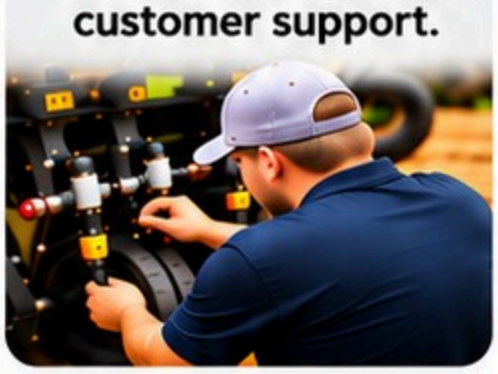
STORAGE TANKS
Bulk liquid fertilizer storage options

DRILL KITS
Get your drill set up for liquid fertilizer

INSTALLATION AND SUPPORT
We install and provide customer support.



LIQUID CARTS
Field-ready liquid cart options

HOW THE PROGRAM WORKS

1 AgTek360 Supplies the Equipment
AgTek360 can provide storage tanks, drill conversions, liquid fertilizer carts and associated equipment.

2 Five-Year Equipment Cost Recovery
Equipment costs are spread over five years. Depending on the equipment price, an additional cost per gallon is included in the fertilizer price to recover the equipment cost.

Example: $10,000 Storage Tank (USD)
$10,000 USD ÷ 5 years = $2,000 USD per year
At 10,000 gallons purchased annually, $0.20 USD per gallon is added to the fertilizer price to cover the equipment cost.

WHY CHOOSE AGTEK360?

- **Minimal upfront investment**
- **Simple, flexible payments**
- **Complete equipment solutions** (tanks, drill kits, installation and liquid carts)
- **Ongoing agronomic support and customer service**

Program subject to equipment approval, a minimum annual purchase of 10,000 gallons of qualifying liquid fertilizer and a signed five-year agreement
