

SUPER 72[®]

SLOW RELEASE NITROGEN

PRODUCT INFORMATION

Super 72 is 28% liquid nitrogen with 72% of its nitrogen in a slow release form. Super 72 features increased crop safety and increased nitrogen absorption, translocation and remobilization. Estimated release pattern is 25-30 days for improved efficiency.

FEATURES

- Formulated as a triazone for improved crop safety
- 72% of nitrogen is in slow-release form

BENEFITS

- Extends nitrogen release for foliar applications
- Encourages plant safety
- Reduces nitrogen leaching
- Reduces nitrogen volatilization

FREQUENTLY ASKED QUESTIONS

Q: Why do I need a slow-release nitrogen?

A: Splitting nitrogen applications reduces environmental losses and improves efficiency while maximizing yield.

Q: How do I apply Super 72?

A: Super 72 is recommended for foliar application on most common field and row crops.

Q: At what rates do I apply Super 72?

A: The foliar application recommended rates for Super 72 are 1-3 gallons.

GUARANTEED ANALYSIS

Total Nitrogen (N)28.0%
 7.8%...Urea Nitrogen
 20.2%...Other Water Soluble Nitrogen*

*20.2% Slow Release Nitrogen derived from Urea-Triazone Solution.
Derived from: urea-triazone solution

PHYSICAL PROPERTIES

pH.....9.5
 Specific Gravity.....1.28 @ 68°F
 Density.....10.7 lbs/gal
 Salt Out0°F

APPLICATION

	Application	Use Rate (per acre)	Timing
Field & row crops; fruits & nuts	Foliar	1-3 gallons	As needed
