

Innovating Agriculture,
Empowering Farmers,
Leading the Future.

Our 360 Approach

At the heart of our 360 approach is the carbon cycle — the cornerstone of sustainable farming. From photosynthesis, where plants capture atmospheric carbon dioxide, to the decomposition of organic matter, which returns nutrients to the soil, every stage is vital for soil enrichment and ecosystem health.

Our crop enhancement products optimize this cycle by promoting plant development and increasing organic carbon in the soil. By integrating humic acids, beneficial microbes, and specialized plant extracts, we improve soil structure, boost microbial activity, and enhance the soil's capacity to store carbon. These efforts contribute to long-term environmental resilience and a carbon - positive future.

Sustainable Productivity

Regenerative agriculture isn't just about environmental stewardship — it's a pathway to increased productivity. Healthier soils result in more resilient crops, better water retention, and higher yields. AgTek360's solutions, crafted with cutting-edge technology and backed by expert support, empower growers to adopt regenerative practices without compromising profitability.

Our products are designed to optimize nutrient uptake, enhance crop resilience against environmental stressors, and improve germination and seedling vigor. By addressing the unique challenges of modern farming, we enable growers to unlock their farm's full potential while contributing to a healthier planet.

Join the movement and embrace the power of AgTek360's 360 approach to sustainable farming. Together, we can regenerate the soil, grow greener, and create a carbon - positive future for generations to come.

Your Growth, Our Focus: Our Commitment to You

Expert Support

Our team of agricultural experts is here to support you at every step. From selecting the right products to implementing best practices, we're dedicated to your success.

Trusted Quality

With AgTek360, quality isn't just a promise; it's our standard. We rigorously test our products to ensure they meet the highest standards of efficacy and safety.

Partners in Growth

Your growth is our goal. We partner with you to navigate the complexities of modern agriculture, providing the tools and knowledge needed for your farm to flourish.

About The Andersons

With a focus on quality, service, and technology, The Andersons strives to provide products designed to make work easier, more efficient, and most effective to achieve the highest yields. From a broad range of fertilizers, micronutrients, soil amendments, and organic nutrients, to patented products and technologies, The Andersons are committed to delivering next-generation solutions with the highest level of quality and customer service in the industry.

AERO-Blitz

Specialized micronutrient blend designed for aerial application to help mitigate midseason stress

AGRO MIX

Micronutrient package for prevention or correction of boron, copper, iron, manganese, molybdenum & zinc deficiencies

Black Gypsum DG

Unique soil amendment combining natural gypsum & humic substances

BORON 10%

Prevents & corrects boron deficiencies in all crops & soil types

COPPER 7.5%

Fully chelated solution of copper EDTA for prevention or correction of copper deficiencies

EEZY K

Formulated with highest potassium & sulfur content on the market – essential nutrients for crop quality & yield

Fulvic LQ

High purity organic fulvic acid which helps plants to better realize their full genetic potential

3-18-18

Low-salt, 80/20 ratio of ortho-to-polyphosphate liquid fertilizer to increase yield potential & produce higher quality crops

6-24-6

Low-salt, 80/20 ratio of ortho-to-polyphosphate liquid fertilizer to increase yield potential & produce higher quality crops

Humic DG

Highly concentrated carbon-based soil amendment

KORRECT™ PLUS

Low salt foliar which is a combination of potassium, manganese & boron

MicroMark DG Humic

Aids crops in prevention or correction of nutrient deficiencies

OVER PASS 10-2-10

Slow-release nitrogen to extend absorption & minimize leaf interaction from nitrogen application

SUPER 25B

25% liquid nitrogen with 25% of its nitrogen in a slow-release form & 0.5% boron

SUPER 72

Increases nitrogen absorption, translocation & remobilization

SWEET 'N EEZY

Liquid sugar blend that helps free up minerals & improves natural bacterial activity in soil

UltraMate LQ

Sulfonated potassium formulation enabling plants to more efficiently utilize applied N, P & micronutrients

ZINC 9%

Fully chelated solution of zinc EDTA for prevention & correction of zinc deficiencies in crops
