Promoting Sustainable Agriculture Methods

We integrate innovation and sustainability. Our solutions drive an eco-friendly, productive future of farming.

At AgTek360, we are dedicated to driving innovation in sustainable agriculture. Our solutions enable farmers to implement eco-friendly practices that regenerate soil health, conserve water, and protect local ecosystems while maintaining productivity and profitability. We provide the technology and knowledge you need to grow green.

- ✓ **Eco-friendly nutrient solutions**
- ✓ **Regenerative agriculture promoters**

Experience Agricultural Excellence Why Choose AgTek360?

Sustainable Practices

Committed to sustainability. Our solutions reduce environmental impact and promote soil health.

Cutting-Edge Technology

Leading agricultural innovation. Our products integrate the latest agritech, addressing modern farming challenges.

Global Reach

Our tailored solutions expertly address local challenges while positively impacting global agriculture

Clout - Natural Herbicide Additive

Clout - Natural Herbicide Additive is a natural, multi-purpose herbicide additive and compatibility agent formulated to promote healthy plant growth and reduce the plant stress resulting from herbicide intake.

A mixture of Clout - Natural Herbicide Additive and herbicide is more efficacious than the herbicide alone.

When a systemic herbicide is applied to a weed, it must penetrate the leaf surface and move through the plants vascular system to the site of action within the plant. Several barriers exist within plants that hinder absorption, including the cuticle, cell wall and cellular membrane. When used as directed, herbicide additives can accelerate the rate at which the herbicide moves through these barriers.

Increases Herbicide Absorption Rate
Increases Spray Retention & Coverage

Promotes Healthy Plant Growth
Helps Reduce Plant Stress

Composition:

Clout - Natural Herbicide Additive is formulated with a complex blend of wetting agents, macro and micro nutrients and plant growth stimulants.

Benefits:

- Reduces the surface tension of the spray solution
- Increases spray solution coverage
- Increases spray retention
- Increases herbicide absorption rate
- Stimulates healthy plants and reduces plant stress
- Enables applicators to reduce herbicide application rates up to 50 percent

Application Details

1. Tank mix the herbicide at the desired reduced rate (typically from 0 - 50% max)
2. Add Clout - Herbicide Additive at 0.25 V/V to 0.6% V/V

TANK VOLUME	1000 Litres	1000 Litres	1000 Litres
CONCENTRATION	0.25% V/V	0.4% V/V	0.6% V/V
CLOUT	2.5 Litres	5 Litres	6 Litres
