Promoting Sustainable Agriculture Methods

We integrate innovation and sustainability. Our solutions drive an eco-friendly, productive future of farming.

At AgTek360, we are dedicated to driving innovation in sustainable agriculture. Our solutions enable farmers to implement eco-friendly practices that regenerate soil health, conserve water, and protect local ecosystems while maintaining productivity and profitability. We provide the technology and knowledge you need to grow green.

- ✓ **Eco-friendly nutrient solutions**
- ✓ **Regenerative agriculture promoters**

Experience Agricultural Excellence

Why Choose AgTek360?

Sustainable Practices

Committed to sustainability. Our solutions reduce environmental impact and promote soil health.

Cutting-Edge Technology

Leading agricultural innovation. Our products integrate the latest agritech, addressing modern farming challenges.

Global Reach

Our tailored solutions expertly address local challenges while positively impacting global agriculture

Defender - Plant Protector & Soil Conditioner

Defender – Plant Protector & Soil Conditioner is a natural plant protector that can be used on a wide variety of crops in order to maintain a strong and healthy harvest.

Stimulates & Maintains Plant Health
Maximizes Nutrient Availability

Maximizes BRUX Levels
Economical

Composition:

Defender – Plant Protector and Soil Conditioner is formulated with high grade macro and micro nutrients, plant extracts, amino acids, proteins, vitamins, minerals, complex carbohydrates and proprietary constituents.

Benefits:

- Stimulates and maintains plant health
- Adds beneficial biology to the soil and plant
- Maximizes the availability of vital nutrients
- Maximizes BRUX levels in order to **promote resistance to frost, insects and disease**

Application Details

Methods of Application:

Defender - Plant Protector and Soil Conditioner can be foliar and soil applied with the aid of conventional spray apparatus.

Recommended Application Rates:

Application rates may vary with environmental conditions, soil type, plant density, canopy, management practices, etc.

- For "initial protection", apply directly to the soil (in row) prior to seeding or at the early stages of plant growth. - 0.5 to 1 litre per acre
- For "preventative protection", apply as required during growth period. - 0.5 to 1 litre per acre
