# Get to Know Us

## Promoting Sustainable Agriculture Methods

*We integrate innovation and sustainability. Our solutions drive an eco-friendly, productive future of farming.*

At AgTek360, we are dedicated to driving innovation in sustainable agriculture. Our solutions enable farmers to implement eco-friendly practices that regenerate soil health, conserve water, and protect local ecosystems while maintaining productivity and profitability. We provide the technology and knowledge you need to grow green.

- ✓ **Eco-friendly nutrient solutions**
- ✓ **Sustainable Agriculture Promoters**

## Experience Agricultural Excellence

### Why Choose AgTek360?

#### Sustainable Practices

Committed to sustainability. Our solutions reduce environmental impact and promote soil health.

#### Cutting-Edge Technology

Leading agricultural innovation. Our products integrate the latest agritech, addressing modern farming challenges.

#### Global Reach

Our tailored solutions expertly address local challenges while positively impacting global agriculture

# Inspire Seed Starter

Inspire – Seed Starter is a liquid, natural seed starter and root growth promoter formulated with macro and micro nutrients, amino acids, organic acids, root growth stimulants, enzymes, proteins, vitamins, minerals and beneficial microbes.

Inspire – Seed Starter also contains constituents that stimulate indigenous microbes in the root zone and has proven to be a reliable performer in low and high rainfall areas and in all soil types except extreme calcareous soils.

**Enables Quick Germination**  
**Ensures Crop Establishment**  
**Increases Stress Tolerance**

**Accelerates Emergence**  
**Aids in Optimizing Yield**  
**Plus More**

## Composition:

Biological seed starters are an affordable and effective way to optimize seed germination, plant establishment, and early growth and yield potential.

It is also one of the lowest financial investments a grower can make to maximize productivity and improve the bottom line.

## Benefits:

- Versatile – Use on any type of crop  
Increases germination; specifically in cold, wet soil
- Increases root development  
Increases uptake of moisture and nutrients
- Provides disease protection – Protects your seed in its most vulnerable state

#### Why Use Inspire - Inspire Starter

Once the seed is planted, it is important that germination occurs uniformly and quickly. If the soil is too cold, germination can be delayed. This can result in seed damage and uneven emergence, and in certain cases, re-seeding may be necessary. Seed starters are effective against problems that occur in cold wet soils, especially limited disturbance and no-till operations and in areas of low moisture. Seed starters are also effective against a broad spectrum of problems including seed decay, seedling diseases and soil pathogens.

## Application Details

#### Recommended Application Rates:

**Peas:**  
Amount of Inspire: 1 litre  
Amount of Water:  
1.5 - 5 litres  
Will treat 1400 lbs of seed

**Lentils**  
Amount of Inspire: 1 litre  
Amount of Water:  
1.5 - 5 litres  
Will treat 1600 lbs of seed

**Corn:**  
Amount of Inspire: 1 litre  
Amount of Water:  
1.5 - 5 litres  
Will treat 1400 lbs of seed

**Soybean**  
Amount of Inspire: 1 litre  
Amount of Water:  
1.5 - 5 litres  
Will treat 1400 lbs of seed

**Barley/Wheat**  
Amount of Inspire: 1 litre  
Amount of Water:  
1.5 - 5 litres  
Will treat 1400 lbs of seed
