# Get to Know Us

## Promoting Sustainable Agriculture Methods

*We integrate innovation and sustainability. Our solutions drive an eco-friendly, productive future of farming.*

At AgTek360, we are dedicated to driving innovation in sustainable agriculture. Our solutions enable farmers to implement eco-friendly practices that regenerate soil health, conserve water, and protect local ecosystems while maintaining productivity and profitability. We provide the technology and knowledge you need to grow green.

- ✓ **Eco-friendly nutrient solutions**
- ✓ **Regenerative agriculture promoters**

## Experience Agricultural Excellence

### Why Choose AgTek360?

#### Sustainable Practices

Committed to sustainability. Our solutions reduce environmental impact and promote soil health.

#### Cutting-Edge Technology

Leading agricultural innovation. Our products integrate the latest agritech, addressing modern farming challenges.

#### Global Reach

Our tailored solutions expertly address local challenges while positively impacting global agriculture

# Surge Pasture Fertilizer

Surge – Pasture Fertilizer is a natural, super concentrated foliar fertilizer for use on pastures and grassland. It can be used alone or in conjunction with inorganic fertilizers in any standard crop management program and can be soil or foliar applied.

Surge – Pasture Fertilizer offers significant benefits for producers who practice sustainable agriculture. A single application of natural pasture fertilizer, applied in early spring, will accelerate growth and enable early grazing.

Overgrazed pastures have undersized plants with under developed root systems and, as a result, they cannot uptake available soil nutrients. Nutrient deficiency can limit the growth of most pastures. Pastures that lack nutrients are constantly under stress, slow growing, unproductive, slow to recover from grazing, and produce poor quality feed for grazing animals. Nutrient applications optimize plant growth, increase yields and optimize distribution over the grazing season, even in areas that experience dry periods.

**Enables Early Grazing in Pastures**

**Optimizes Plant Growth**

**Accelerates Pasture Growth All Season**

**Increases Yields**

## Composition:

Surge – Pasture Fertilizer is formulated with high grade macro and micro nutrients, plant extracts, amino acids, proteins, vitamins, minerals, complex carbohydrates and proprietary constituents.

## Application Details

**Surge - Pasture Fertilizer can be used alone or in conjunction with inorganic fertilizers in any standard crop management program.**

#### Methods of Application:

Surge - Pasture Fertilizer can be soil or foliar applied with a conventional sprayer, or through direct injection into the irrigation system. Grass responds vigorously to foliar applied pasture fertilizer and a well-planned fertilization program can double production. Foliar applications should be carried out in early spring when plants are 3 to 4 inches in height. Repeat after each cutting or grazing or as required.

#### Recommended Application Rates:

Typical application rate is 1 to 2 litres per acre. Typically, 1 to 3 applications are applied each season.

## Benefits:

- Enables early grazing in pastures
- Accelerates pasture growth all season
- **In certain cases, applying pasture nutrients alone can reduce or eliminate the need for herbicide and pesticide applications**
