BASESLOADED

EDTA Chelated Nutrients

GENERAL INFORMATION

BasesLoaded is intended for the prevention and/or correction of boron, copper, iron, manganese and zinc deficiencies. It can be applied alone or in combination with compatible agriculture chemicals or liquid fertilizers, including those containing 100% orthophosphate and suspensions.

FEATURES & BENEFITS

FEATURES

- Low-salt, chloride free & near neutral pH
- 100% water soluble
- 100% EDTA chelated micronutrients
- Non-corrosive

BENEFITS

- Corrects and/or prevents micronutrient deficiencies
- Compatible with all types of fertilizers
- Compatible with most herbicides & insecticides
- Promotes maximum yield potential

FREQUENTLY ASKED QUESTIONS

Q: Can I mix BasesLoaded with my starter product?

A: Yes, applying BasesLoaded with starter fertilizer at planting time helps prevent early-season crop deficiencies.

Q: Can I tank mix BasesLoaded with crop protection products?

A: Yes, it is compatible with most popular pesticides.

Q: Why use a chelated micronutrient?

A: EDTA chelates protect zinc, manganese, calcium, copper and iron from 'tie-up' in the soil.

Q: Can BasesLoaded be mixed with crop protection products?

A: Yes, BasesLoaded is compatible with many crop protection products as a tank mix partner. The Andersons recommends a compatibility (jar) test before field mixing and application. Always read and follow all individual product labels before use.
