Plant and Soil Health Solutions

Sweet 'N Eezy®

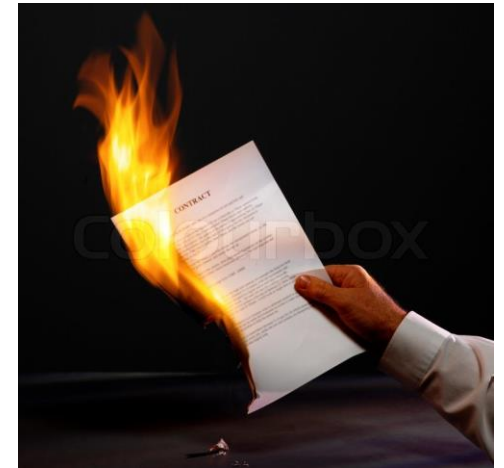

- A proprietary blend of high fructose corn sugars blended with a nitrogen source for stabilization
- Provides sugar to the plant and gives a quick energy boost

Logs (NPK, soil health) -
Long lasting energy, the
foundation of a fire

Sticks/Kindling (starter)
- Give moderately
sustainable energy to
the fire

Paper (Sweet 'N Eezy) -
Gives a quick energy
boost to the fire

About Sweet 'N Eezy®

Proprietary liquid sugar solution that serves as a food source and biostimulant to soil microbial communities, whose microbes help to free up more mineral nutrient for the crop.

- Features

- Feeds microbes at any stage of crop growth—soil, starter, or foliar
- Highly compatible; may be applied with herbicides, fungicides, and pesticides.
- Acts as a humectant when foliar feeding

- Benefits

- A clear, clean, liquid product
- Releases nutrients that are tightly held in the soil
- User-friendly sugar source; can be transferred with a regular transfer pump
